families together**

FOR IMMEDIATE RELEASE

Hot mix in a bag – not just a pothole repair solution!

Surrey, BC, March 14, 2013 – EZ Street is being utilized extensively in over twenty countries around the world. Widely recognized as a high quality, high performance asphalt, proven to permanently repair potholes in any weather condition and instantly ready for traffic... ***but did you know that EZ Street is also being utilized as a large scale paving solution?***

For example EZ Street Canada's City of Edmonton case study – the City tested EZ Street asphalt as a paving alternative and found the final product outperformed their expectations. Rural Vancouver Island, Deering Bridge in Port Renfrew where EZ Street was put to the test during a rehabilitation project of a timber bridge deck. Paving had to be completed within one day while keeping one traffic lane open. Even a pavement and road surfacing project on Yellowknife's Highway No. 3 in the North West Territories during extreme winter conditions (-10C) did not deter EZ Street's performance.

These are just a few of the many [case studies](#) profiled on EZ Street's website including in-depth video and images as well as a wealth of technical information and recent white paper, [Cold Joints](#). Cold joints don't occur when using EZ Street asphalt.

Time is Money!! EZ Street is truly hot mix in a bag with a long list of paving benefits. There is a significant reduction in long term maintenance costs when using EZ Street versus regular asphalt.

Visit us at World of Asphalt, EZ Street Company booth #703. Learn more about EZ Street Canada at www.ezstreetasphalt.ca.

About Mainroad Maintenance Products and Mainroad Group:

Mainroad Maintenance Products, a division of the Mainroad Group, is the exclusive producer and distributor of EZ Street Canada products in British Columbia, Alberta, Saskatchewan, Manitoba and Ontario. Mainroad Group is a 100% employee-owned collection of companies specializing in infrastructure products and services.
